### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:-

On page 1, line 5, the reference characters "SC12636TC" has been changed to -10/656,676-- for US Patent Application serial number.

### ***Allowable Subject Matter***

2. Claims 1-31 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest a method and a circuit for reducing write field disturb in a random access memory of magnetic elements. In particular, a random access memory of magnetic elements comprises: write drivers coupled to first ends of corresponding ones of write conductors, wherein at least one write driver is configured as follows: (a) for switching a write current onto a corresponding write conductor in response to selection of a bit cell of the corresponding write conductor; and (b) for switching a disturb counteracting current onto the corresponding write conductor in response to non-selection of a bit cell associated with the corresponding write conductor, the disturb counteracting current including a recycled portion of the write current of a neighboring write conductor of a selected bit cell.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The documents listed in PTO-892 form are directed to magnetic memory devices having means to reduce write current disturbance.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
